

ART Cohort Analysis - 2023

Table1: Outcome of people with HIV who started ART in 2022 (12 months) by sex and age*

	Female	Male	<15 yrs.	15+ yrs.	Total	%
a. Number who initiated ART (N)	67	460	-	527	527	100%
Status (outcome) after 12 months of starting ART						
b. On 1st line regimen	55	410	-	465	465	88%
c. On 2nd line regimen	3	5	-	8	8	2%
d. Lost to follow-up (F)	4	25	-	29	29	6%
e. Dead (D)	5	20	-	25	25	5%
f. Alive and on ART(A) = {N - (D+F)}	58	415	-	473	473	90%

Table2: Outcome of people with HIV who started ART in 2021 (24 months) by sex and age*

	Female	Male	<15 yrs.	15+ yrs.	Total	%
a. Number who initiated ART (N)	53	270	2	321	323	100%
Status (outcome) after 12 months of starting ART						
b. On 1st line regimen	43	229	2	270	272	84%
c. On 2nd line regimen	2	2	-	4	4	1%
d. Lost to follow-up (F)	2	27	-	29	29	9%
e. Dead (D)	6	12	-	18	18	6%
f. Alive and on ART(A) = {N - (D+F)}	45	231	2	274	276	85%

Table 3: Outcome of people with HIV who started ART in 2020 (36 months) by sex and age*

	Female	Male	<15 yrs.	15+ yrs.	Total	%
a. Number who initiated ART (N)	70	294	4	360	364	100%
Status (outcome) after 12 months of starting ART						
b. On 1st line regimen	52	218	3	267	270	74%
c. On 2nd line regimen	-	8	-	8	8	2%
d. Lost to follow-up (F)	5	40	-	45	45	12%
e. Dead (D)	13	28	1	40	41	11%
f. Alive and on ART(A) = {N - (D+F)}	52	226	3	275	278	76%

Table 4: Outcome of people with HIV who started ART in 2018 (60 months) by sex and age*

	Female	Male	<15 yrs.	15+ yrs.	Total	%
a. Number who initiated ART (N)	60	240	3	297	300	100%
Status (outcome) after 12 months of starting ART						
b. On 1st line regimen	40	180	3	217	220	73%
c. On 2nd line regimen	2	10	-	12	12	4%
d. Stopped for medical reasons (S)	1	-	-	1	1	0%
e. Lost to follow-up (F)	4	22	-	26	26	9%
f. Dead (D)	13	28	-	41	41	14%
g. Alive and on ART(A) = {N - (S+D+F)}	42	190	3	229	232	77%

Note: PLHIV who left the country were removed from both numerator and denominator. This is a draft version of the report.
